Learning from and with each other:

The aim is to mutually introduce the practice of vocational education and training administration in Europe and to define the target profile of "Excellent vocational education and training administration: local-regional-national-international?!".

In the international DunE-BB-EU Dialog Forum, three central questions will be explored:

- 1) Why does a digitally supported and sustainability-oriented center of excellence in vocational education and training in Europe need excellent vocational education and training administration?
- 2) Which forms of vocational education and training administration play a significant role in achieving this?
- 3) How can vocational training administration be made more efficient, less bureaucratic, more agile and more coherent?

3 - Level-system: The future of an excellent VET administration in Germany/EU?
